

OXP-Series Ozone Generators

The OXP Series are air cooled Ozone Generators. They can produce ozone from 10 to 80 g/hr from 2.2 to 18 LPM of oxygen at pressure up to 50 PSI (higher pressure available). These Ozone Generators are compact, efficient, and easy to use with a wide variety of options and features.

OXP TECHNOLOGY

The OXP Ozone Generator line produces ozone from an air cooled cell and requires 90% pure oxygen for operation. Integrated 4-20 mA or 0-10 VDC is provided to allow adjustment of the ozone output from 0-100%. The OXP Series have a Stainless Steel enclosure with silent operation. The OXP units are easy to use and are good for high pressure applications.

SYSTEM FEATURES

- Air cooled Ozone Generator – no cooling water necessary
- Stainless Steel Enclosure
- Silent Operation
- Adjustable ozone output (standard)
- Easy to install and operate
