

**General Questionnaire**

Customer Name:	
Company Name:	
Project Reference:	
Phone:	
E-mail:	

1. Describe your application briefly. Examples: Water bottling plant, cooling tower, swimming pool, municipal drinking water, wastewater treatment...
2. Describe your present treatment problem and/or the desired results.
3. What is the total fluid volume, flow and pressure in your system?
4. Is your system recirculating fluid? If yes:
  - a. How much make-up water is added per day?
  - b. What is the recirculating flow and pressure?
  - c. Do you use a filter, what kind?
5. What is the average and maximum temperature of the treated fluid during the year?
6. What power (voltage, current, frequency) is available? Is it from a local generator (on a boat for example) or a standard line?
7. Please attach sketch of your present hydraulic layout and elevation, along with measurements of the available for equipment.
8. Is there a source of dry air or oxygen on the site? If so, what capacity (if any) would be available for ozonation treatment?
9. Do you plan any future expansion of your operation?

214 West Highway 18  
Inwood, IA 51240  
Phone: 515-635-5854

10. Please provide your water/fluid test results showing BOD and COD (or TOC), along with any other typical compounds.
