

Meat Processing Plants Questionnaire

Customer Name:	
Company Name:	
Project Reference:	
Phone:	
E-mail:	

1. Briefly describe your application (feed water, plant process, treated water usage).
2. What is the total water flow per day and maximum flow demand?
3. What pressure is required in your system?
4. What is the average and maximum temperature of the treated water during a year?
5. What power is available (voltage, current, frequency)? Is it from a local generator (as on boats), or from a standard line?
6. Please attached a sketch of your present hydraulic layout and elevation, please include the space available to the equipment, or a layout of the plant and including the locations at which you need the treated water supply.
7. Do you plan any future expansion of your operation?
