October 27, 2009

Dave Lyman,

I wanted to take this opportunity to personally thank you and your company for your guidance and your support during our time of crisis this past year with regard to our odor issues with the Department of Health and the local community.

The ozone system you have designed and installed on our behalf has solved our odor problems, such that we have not received one complaint and/or fine since installation has been completed in September of 2009.

Furthermore, the system you have installed not only eliminated the odors emanating from our building to the surrounding community, but has also significantly improved the air quality within our premises due to the large volumes of spices stored in our warehouse.

Lastly, I want to thank you for the expedience in manufacturing and delivery of the additional ozone generators in early September to supplement the existing system that was previously installed, which mitigated all odors in all weather conditions.

In a recent meeting with the Middlesex County Dept of Health on September 20, 2009, Glendale Warehouse Corp was praised and complimented by it's director, Mickey Gross that our efforts to eliminate odors in the surrounding community have been successful and furthermore, that the fines previously issued would possibly be significantly reduced due to our efforts in mitigating this problem.

Although we have tried other technologies prior to using ozone to eliminate our odor issues, it wasn't until the ozone generator system provided was fully operational that we were able solve this odor issue that has plagued our company for the past 18 months.

Once again. thank you for all of your efforts and support.

Sincerely,

Frank Collette, President

Glendale Warehouse & Dist Corp.
