## **CDU-15 Ozone Destruct Device**

## **CATALYST TECHNOLOGY**

The device uses a simple design with all the stainless-steel materials and carulite-200 catalyst touching ozone gas. This will provide excellent material compatibility and longevity.

Replacing the catalyst material is very simple, and complete maintenance should take no longer than 30 minutes. A complete catalyst replacement kit is available that includes the required material, replacement screens and a new gasket.

## **CARULITE 200**

The CDU Ozone Destruct Device uses Carulte 200 granular catalyst for ozone destruction. Carulte 200 is a safe material that is landfill approved and is not considered hazardous waste.

## **APPLICATIONS**

- Ozone Discharge
- Fumigated Ozone Discharge
