

OXG-10

SPEC SHEET

OXG TECHNOLOGY

The OXG Series are built with an Ozone Generation Cell and Oxygen Concentrator in one system. The OXG-10 can produce ozone at 10 g/hr from 4 LPM. These Ozone Generators are compact, efficient, and easy to use with a wide variety of options and features. Simply plug into electrical power and produce both oxygen and ozone from one unit.

Main Features

- Turnkey system, requires only electrical power for operation
- Integrated Ozone Leak sensor for safety
- Integrated Oxygen purity meter
- 3-stage air filtration prior to O₂ concentrator
- Automated control and operation
- Can integrate directly with a Dissolved ozone meter or other controller

Controls

- Adjustable ozone output via manual dial, 4-20 mA input, or 0-10 VDC input
- Dry contacts to start system
- Dry contacts to start O₃ Gen separately
- O₃ leak alarm feedback – dry contacts open
- System ON feedback – dry contacts close
- O₃ Gen ON feedback – dry contacts close

OZONE PRODUCTION:

Performance Chart

Product Specifications

Feed Gas	Built-in O2 Concentrator
Nominal Gas Flow Rate	4 LPM O2
Operating Pressure	- 5 to +5 PSI
Max Pressure	5 PSI
Cooling Method	Air Cooled
Corona Cell	Quartz, Stainless Steel
Gas Connections	1/4" NPT Fitting
Dimensions	12" x 25" x 32"
Temperature Range	35-95 deg F
Max O3 %	3% - 5%
Power	120 VAC, 60 Hz, 1-phase, 10amp
Ozone Output	10 g/hr

Customizable Options

External Compressed Air – If plant air is available, or in very humid/poor air quality environments the internal air compressor can be removed at a cost savings. The compressor will be replaced with an air solenoid valve, pressure regulator, and 2-stage air filtration.

Stainless Steel Enclosure – Upgrade the enclosure to be stainless steel
