

LARGE SGA SERIES OZONE/OXYGEN SYSTEMS

Features

- Stainless Steel Floor Mount Enclosure
- Air-Cooled Ceramic and Titanium Reactor Cell
- Onboard Oxygen Concentrator
- 0.01 Micron Filter/Regulator with Auto Drain
- Over-Temperature Protection

Controls

- 4-20mA or 0-10VDC Input
- Variable Output Control
- Feed Gas Flow Control
- Remote On/Off Control
- Power Supply Control Signal Reference Meter
- Reactor Pressure Control
- Reactor Pressure Gauge
- Air Input Pressure Gauge
- Remote Lockout

High Ozone Output

The Large SGA Series of integrated ozone/oxygen systems combines air-cooled ozone generation with onboard oxygen concentration in a compact, stainless steel housing.

Powerful and user-friendly, the Large SGA Series can produce up to 12.7 pounds of ozone/day and is ideal for a broad range of commercial and industrial applications.

User Friendly

The Large SGA Series is easy to operate with a convenient, intuitive control panel, including 0-100% variable

power control, feed gas control, inlet air pressure and reactor back-pressure gauges; power supply control signal reference meter; and LED ozone production indicators. The control interface includes 4-20mA or 0-10VDC input signal for 0-100% variable ozone concentration control.

Model: Large SGA53/63/64

LARGE SGA SERIES OZONE/OXYGEN SYSTEMS

Robust and Reliable

The heart of Pacific Ozone systems is our patented Floating Plate Technology™ in the ozone reaction cells. The exclusive FPT design produces highly reliable and efficient ozone generation in affordable, air-cooled systems. Floating Plate Technology allows challenging ozone applications and products to be approached with confidence and ease.

The Large SGA Series is designed to operate with high-quality plant air provided from the facility. Stand-alone air compressor packages are also available from Pacific Ozone if plant air is unavailable or insufficient.

SGA Series Family

The Large SGA Series is part of a family of integrated ozone oxygen systems that include the standard SGA Series with ozone production capability to 3.2 lbs./day. All SGA Series systems are engineered to meet all of the ozone process requirements found in the most demanding applications; yet, they are easy to install, simple to operate, and will provide years of trouble-free operation.

LARGE SGA SERIES OZONE/OXYGEN SYSTEMS
